Experience

UI/UX Designer and Lead Frontend Developer (Remote)

Bench5 – Jan 2023- Jan 2025

- Designed and developed scalable, high-performance applications using Next.js, React.js, and Tailwind CSS.
- Led state management implementations using Redux, Context API, and Zustand to ensure efficient and predictable application state handling.
- Integrated RESTful APIs and GraphQL endpoints, ensuring seamless communication between the frontend and backend services.
- Implemented authentication and authorization using JWT and OAuth for secure user access.
- Developed and maintained CI/CD pipelines using GitHub Actions and Vercel, automating build, test, and deployment processes.
- Utilizing hosting services, firebase for site deployment and app distribution.
- Conducted usability testing and gathered feedback to improve UI/UX, resulting in a 20% improvement in user engagement.
- Improved frontend performance through code splitting, lazy loading, and optimizing assets, reducing load times by 30%.
- Experience with Git for version control.

Mobile Developer (On Site)

Flinch Hub – April 2020 – July 2021

- Tutored an annual masterclass where I handled mobile development and web development.
- Streamlined stacks used were Flutter and Firestore databases from the Google Cloud Platform.

Administrative Assistant and IT support (On Site)

Ghana Cocobod – Nov 2021- Sept 2022

- Supported the accounts department of the company by preparing invoices.
- Bolstered the statistics department by volunteering my service as data entry assistant.
- Collaborated with departments across the company, including marketing and project management, in developing new ideas, initiatives, products, and services.
- Provided customer service.
- Involved in mentoring new team members.

Full-stack Mobile Developer (Remote)

Freelance- April 2021 – Oct 2021

- Engineered an E-commerce application.
- Worked on this project from development to deployment, as a full-stack mobile developer on a team of two engineers working on a food delivery system.
- Developed mobile back-end with Firebase Cloud from Google Cloud Platform and Firebase authenticator for user authentications.
- Used git for code versioning management.

Team Lead and Developer (On Site)

KNUST- April 2018 – May 2018

- Administered as the team lead of the group for the project.
- Programmed this project with 4 other software engineers.
- Developed an agricultural native android application to transport and track crops to their destination.
- Encouraged team members to put in maximum effort in achieving the required output.
- Employed Adobe XD to design the pages of the project.
- Java was the programming language for the project and native android was used as the framework for the project.

Personal Projects

Agrimigo (On Site)

Kumasi – April 2021 – October 2021

- Served as the front-end and back-end developer of agrimigo project.
- Assembled the front end of the application with the Flutter framework per the UX design and dart programming language.
- Linked the Firebase cloud to the IoT device to transfer data to the cloud.
- Utilized the usage of API's such as REST API to update the application with a news feed.

ICT Awareness

- Troubleshooting devices.
- Learned with Microsoft office packages.

- Veteran in Windows and Linux systems.
 - Hands-on experience with modern front-end frameworks such as Flutter, Next js, Tailwind CSS and native Android.
 - Experience in mobile development using tools such as Android Studio, Visual Studio and Xcode.
 - Experience in graphic design applications and mock-up tools such as Figma and Adobe XD.
 - Expertise with responsive and adaptive design.
-

Education

BSc Computer Science (Sept 2017 – Nov 2021)

Kwame Nkrumah University of Science and Technology, Kumasi, Ghana

Awards

- Best Software User interface Vodafone Hackathon (April 2018 – May 2018)

Languages

- English (Fluent)
